

Encounter Data Processing System General Updates

- **REMINDER:** The **EDS Incident Tracking Tool** is a service for incidents related to Encounter Data Reports and edits only. Questions or issues regarding the TA1, 999, 277CA, or EDPS reports can be submitted to the EDS Incident Tracking Tool at www.cssoperations.com. All other operational guidance questions or comments should be submitted directly to the EDS Inbox at eds@ardx.net.

MAO-002 Reports

- **Edit 03102 – Provider Type or Specialty Not Allowed to Bill Procedure** is a frequent error that can be prevented by ensuring a valid single source provider NPI is submitted with the encounter. If the rendering provider is different from the billing provider, please ensure all required information is submitted for that rendering provider.
- **File 2 Test Cases** - There are a select number of MAOs and other entities who have passed File 1 testing with 100% acceptance through the submission of separate files. To avoid the rejection of File 2 test cases, please ensure any File 2 encounters submitted are for ICNs that have already been accepted on the MAO-002 report.
- **Edit 98325 – Claim is an Exact Duplicate of a Previously Priced Claim** is a frequently occurring error and is being investigated for further information. MAOs and other entities should wait until MAO-002 reports are returned prior to submitting any corrected files to prevent duplicate claim errors.
- **Edits 02110 – Beneficiary Health Insurance Carrier Number (HICN) Not on File** and **02240 – Beneficiary No Enrolled in Medicare Advantage Organization for Date of Service** are still under investigation. Beneficiary membership tables have been updated.
