

### **Important Tips for End-to-End Testing**

1. Please submit data using 2012 Dates of Service; however, do not submit data with future dates of service.
2. Submitters must submit sample data representing each of the Test Cases.
3. Please identify the test case in the last four characters of the CLM01 element 1028 with "TC#". For example, Test Case 1 should be populated TC01.
4. For all test cases that required linking, submitters will need to wait until they receive the ICN on a 277CA before they are able to complete those test cases.
