

Encounter Data Processing System General Updates

- For DME claim submissions, MAOs and other entities must use the Proposed 5010A1 Edits for CEDI in the CEM Edits Spreadsheet located on the www.cms.gov website. Column "T", labeled "**Proposed 5010A1 Edits CEDI**", provides the appropriate guidance on the data segments and elements to submit for DME.

Disposition / Error Code	Proposed 5010A1 Edits Part B	Proposed 5010A1 Edits CEDI
IK403 = 2: "Conditional Required Data Element Missing"		If 2000B.PAT07 is present, 2000B.PAT08 must be present.
IK403 = 7: "Invalid Code Value"		2000B.PAT07 must be "01".

- Updates to the business cases and edits for DME encounters will be included in the July release of the 837-P (DME) Companion Guide. Edit updates will also be included in the Professional and Institutional July release of the Companion Guides.

Edit Resolution Updates

MAOs and other entities may begin resubmitting files for the following edit errors beginning on Monday, 7/16. Please note the change in resolution dates for **edits 20505 and 20510**, as further research is required for the ambulance revenue code/HCPSCS errors system edits. CMS will release further details upon resolution of edits.

Edit Number	Description	Resolution Date	Impact
02110	Beneficiary HICN Not on File	7/13/12	INST, PROF
02240	Beneficiary Not Enrolled in MAO for DOS	7/13/12	INST, PROF
