# The Non-Cancer Length of Stay Rate (NCLOS Rate)

Provider Specific NCLOS Rates allow Palmetto GBA to:

- Characterize its entire hospice provider population
- Identify trends
- Focus education and medical review.

NCLOS Rates are calculated using the following formula\*:

$$\frac{\text{Number of non-cancer beneficiaries with LOS >210}}{\text{Total number of non-cancer beneficiaries}}$$

\*NCLOS Rate values can range from 0: no beneficiaries had stays > 210 days, to 1: all had stays > 210 days. The units are per 100 beneficiaries (e.g., a NCLOS Rate of 0.15 means that 15 beneficiaries out of 100 had stays > 210 days)
